FOR IMMEDIATE RELEASE

INT Releases INTViewer 4.3 update to its unique Data Visualization Platform for Upstream E&P

INTViewer 4.3 features new functionality that facilitates rapid analysis and QC of geophysical data, incorporating new well log visualization, improved handling of map and culture data, and support for Google Earth™.

HOUSTON, TEXAS (September 8, 2011) – INT™ announced today the general availability of INTViewer™ 4.3, the latest version of its innovative data visualization application and development platform for seismic analysis in the Upstream Exploration and Production (E&P) industry. INTViewer 4.3 is easy-to-learn, supports large data sets, and reduces preparation time to share data and analysis results with peers, management, and partners.

Highlights for this new release include:

- Visualization of log curves and markers in well log windows from LAS 2.0 and 3.0 files
- 3D visualization of log curves and markers
- Well trajectories can be displayed in XSection windows
- Content of map windows can be exported to Google Earth™ via Kmz export
- Corner point geometries of seismic volumes can be detected automatically during indexing
- Prestack volumes can be visualizaed in 3D for more than one ensemble key
- Outline of a seismic map can be exported as an arbitrary line and also saved in the KML format for use in Google Earth™
- DXF files can be visualized in GIS layers
- Improved support for 3D visualization of Gocad datasets.
- Enhance API to develop custom plug-ins for well data

INTViewer is a visualization solution for use on virtually any Windows, Mac, Linux, or UNIX operating system and is designed for multiple environments including laptops, workstations or visualization centers. INTViewer also provides a standards-based, extendable architecture based upon the powerful Netbeans Rich Client Platform. Featuring a comprehensive API for access and control of menus, data, and custom displays, INTViewer can be used as a framework for geoscientists who wish to customize the application by adding proprietary plug-ins and utilities. For more information about INTViewer, visitwww.int.com/intviewer.

About INT
INT is a leading supplier of graphics software components for data visualization in Upstream E&P and other technical industries. Our products include open and expandable visualization software, visualization software development components, and software development services. INT solutions support Java, C++, and .NET environments. For more information about INT, visit www.int.com or e-mail intinfo@int.com.
