FOR IMMEDIATE RELEASE

INT Releases GeoToolkit 4.3

GeoToolkit™ is a C++ library of visualization components that permit software developers to fast-track their development of Oil and Gas E&P applications in Windows or Linux. Versions are also available for Java and C#/.NET.

HOUSTON, Texas (May 23, 2013) – Interactive Network Technologies, Inc. (INT), a leading developer of high performance graphics components, announces availability of GeoToolkit 4.3.

Developed for data visualization in upstream Oil and Gas, GeoToolkit is a package of C++ libraries that provides support for specialized Seismic, Contour, WellLog, and Well Schematic displays. GeoToolkit also includes multi-language support, sophisticated vector object handling, scaled display and hardcopy (including CGM output), and is integrated with the Qt environment. GeoToolkit components reduce effort required to complete complex software projects, promote reusability and consistency across applications, and allow developers to focus on their core technologies rather than spend time writing data displays.

Highlights for this new release include:

- Support for Qt 4.8.x and compatibility with Qt 5
- Added support for Clang compiler
- Fault symbols and custom rendering strategies for contour display
- Contouring support for ZMap format and T-SURF data
- Amplitude analyzer tool for seismic display
- Positive and negative infinity colors support for seismic display
- Collapsed tracks in log displays
- Improved performance and rendering quality of deviated logs
- High-level classes to simplify the creation of log cross-section displays

For more information about GeoToolkit, or to request an evaluation, visit our website at www.int.com.

About INT:
INT is a leading supplier of graphics software components for data visualization in Upstream E&P and other technical industries. Our products include open and expandable visualization software, visualization software development components, and software development services. INT solutions support Java, C++, and .NET environments. INT is a Microsoft® Certified Partner.

INT, the INT logo, and GeoToolkit are trademarks of Interactive Network Technologies, Inc. in the United States and/or other countries.. For more information about INT, please visit www.int.com or e-mail intinfo@int.com.
