FOR IMMEDIATE RELEASE

INT Releases INTViewer™ 5.1 update to its unique Data Visualization Platform for Upstream E&P

INTViewer 5.1 introduces a much enhanced cross-plot capability, advanced picking functionality, improved interface for indexing data and several new and exciting plugins.

HOUSTON, Texas (April, 2015) – INT announced today the general availability of INTViewer 5.1, the latest version of its innovative data visualization application and development platform for seismic analysis and QC in the Upstream Exploration and Production (E&P) industry. INTViewer 5.1 is easy to learn, supports large data sets, and reduces preparation time to share data and analysis results with peers, management, and partners.

Highlights for this new release include:

- Cross-Plots have been enhanced with histograms, trend lines & statistics, cursor synchronization and multi-well capabilities.
- XSection windows, horizons can now be colored by attribute. Out of plane picks can also be displayed.
- Added Enhanced horizon picking options
- Added Well log window profiles to select and color curves automatically
- Added Histograms for horizons and pointsets
- The seismic indexer and seismic transposer tools have been redesigned for easier use. 2D lines can be indexed for faster access and cursor synchronization between XSection and Map windows.
- The color palette was improved for a cleaner look and feel.

New Optional Plugins (accessible from Tools → Download Plugins)

- ZgyData plugin to read Petrel seismic datasets (on Windows only)
- Horizon Attribute Extraction plugin to analyze and visualize properties and statistics along a single horizon, or in windows defined by or between horizons
- Mineral Rights plugin to manage exclusion zones in seismic data for maintaining compliance with subsurface license restrictions

INTViewer is a visualization solution for use on virtually any Windows, Mac, Linux, or UNIX operating system and is designed for multiple environments including laptops, workstations or visualization centers. INTViewer also provides a standards-based, extendable architecture based upon the open source Netbeans Rich Client Platform. Featuring a comprehensive API for access and control of menus, data, and custom displays, INTViewer can be used as a framework for geoscientists who wish to customize the application by adding proprietary plug-ins and utilities. For more information about INTViewer, visit www.int.com/products/intviewer.

About INT:

INT is a leading supplier of graphics software components for data visualization in Upstream E&P and other technical industries. Our products include open and expandable visualization software, visualization software development components, and software development services. Featuring a comprehensive API for access and control of menus, data, and custom displays, INTViewer can be used as a framework for geoscientists who wish to customize the application by adding proprietary plug-ins and utilities.
