FOR IMMEDIATE RELEASE

INT Releases GeoToolkit 4.4

GeoToolkit™ is a C++ library of visualization components that permits software developers to fast-track their development of Oil and Gas E&P applications in Windows or Linux. Versions are also available for Java, C#/.NET, and HTML5.

HOUSTON, Texas (December 10, 2015) – Interactive Network Technologies, Inc. (INT), a leading developer of high performance graphics components, announces availability of GeoToolkit 4.4.

Developed for data visualization in upstream Oil and Gas, GeoToolkit is a package of C++ libraries that provides support for specialized Seismic, Contour, WellLog, and Well Schematic displays. GeoToolkit supports localization (multi-language support), sophisticated vector object handling, scaled hardcopy (including CGM output), and is integrated with the Qt environment. GeoToolkit components reduce the effort required to complete complex software projects, promote consistency across applications, and allow developers to focus on core technologies rather than spend time writing data displays.

Highlights for this new release include:

- Support for Qt 5.*
- Support for VisualStudio .NET 2013
- Added LAS 3.0 and DLIS log format support
- Improved performance and presentation of deviated logs
- Display Image logs, including deviated image logs
- Multicore rendering for improved seismic display performance
- New ZMAP data loader
- Visualization of deviated well schematics

For more information about GeoToolkit, or to request an evaluation, visit our website at www.int.com.

About INT:
INT specializes in efficient solutions for data display: providing expandable visualization applications, software development libraries, and custom software services. Utilizing the latest software technologies, products include INTViewer platform for seismic analysis and QC, web-based viewers for seismic, logs, and drilling data, plus GeoToolkit graphics libraries for programmers in Java, .NET, and HTML5 environments. INT is a Microsoft® Certified Partner.

INT, the INT logo, and GeoToolkit are trademarks of Interactive Network Technologies, Inc. in the United States and/or other countries.. For more information about INT, please visit www.int.com or e-mail intinfo@int.com.
